

To whom it may concern,

From August until Christmas 2022, William was in a fulltime internship as a software engineer with Lunar. He was placed in squad Artemis whose main focus is credit and lending. Within this highly specialized area, William has worked with a full restructure of GDPR compliance, upgrading the CRM to further detail customers' application and/or loan information and has delved into the loan application flow in the Lunar app – amongst many other things. Navigating in this field of banking requires focus, discipline, natural curiosity and a whole lot of patience. William encompasses all these adjectives.

We pride ourselves in giving a large portion of responsibility to our interns from day one, and we view them as an integral part of the team with the exact same rights as any other developer. And William has entirely lived up to the expected level of taking responsibility of one's own work. Not only does he complete given tasks to a highly satisfactory degree, but he also goes beyond that and goes straight to the Credit department to see if they're missing anything more that he can develop for them. In that, William also maintains communication with stakeholders without me necessarily being involved – something I have not expected or asked of him, but something that he himself found natural to do. In a busy workday, it is highly appreciated to have employees who take charge and know when to (and when not to) run with the ball themselves.

William, as a person, is lovely to be around. Cheerful, good humor, and very talkative – but knows when it's time to get professional. He's a good communicator in both Danish and English, and he knows when to ask for help, and when to "report" back on work tasks or issues.

Due to a hiring freeze, we were unfortunately not able to hire William as a student helper at the end of the term – although we would have liked very much to have William onboard.

Therefore, I can only give my best recommendations to any future employer of William – they will be lucky to have him.

Best regards,

Therese Kristiansen  
Product Manager, Credit and Lending
